

360° ANIMATED VIDEOS

Just Watch and Explore

A 360° video experience through VR glasses offers effortless immersion into a virtual world. Simply put on the headset and let the story unfold around you in every direction. There's no need for controllers or clicks—just sit back and explore visually, as if you're truly there.

Key Benefits

Immersive Awareness

Transform complex topics into clear visual stories

Flexible Platforms

Accessible across VR, MR, 360°, screens, and immersive environments

Educational Impact

Clear learning through visual storytelling.

Lasting Engagement

Deliver memorable experiences

Why Choose Us?

We create immersive 360° and VR experiences that educate, engage, and inspire, turning complex concepts into memorable and impactful journeys.

Hajj 360° Experience

A comprehensive 360° animated experience that guides users through the complete Hajj journey. It explains each ritual step-by-step, ensuring clear understanding in a safe and immersive virtual environment.

Umrah 360° Experience

An immersive virtual walkthrough of the Umrah rituals, allowing users to experience Tawaf, Sa'i, and key holy locations in Makkah with guided instructions and realistic 360° visuals.

Makkah360° Experience

Allows users to explore the holy landmarks of Makkah, combining spiritual and educational content to highlight the history and religious significance of sacred sites through 360° and Virtual Reality technologies.

Madinah 360° Experience

Allows users to explore the holy landmarks of Madinah, combining spiritual and educational content to highlight the history and religious significance of sacred sites through 360° and Virtual Reality technologies.

Awareness 360° Simulation

UN 360° Awareness Experience

A 360° immersive experience created for a United Nations initiative in Kuwait to enhance community awareness through a realistic virtual environment showcasing the organization's core challenges and missions.

Overpass VR & 360°

A powerful awareness-focused 360° simulation that places users inside real-life traffic scenarios to understand road risks and correct safety behaviors, including learning the proper and safe ways to cross streets.

Text While Driving 360° & VR

A focused 360° animated experience demonstrating the dangers of mobile phone use while driving.

Users witness how distraction affects reaction time and leads to serious accidents.

Saudi Environment & Petrol Awareness 360°

A 360° immersive awareness experience in Saudi Arabia that highlights the importance of our environment and the vital role of oil in everyday life. Users explore realistic scenarios demonstrating the impact of oil depletion and the significance of sustainable practices for a balanced future.

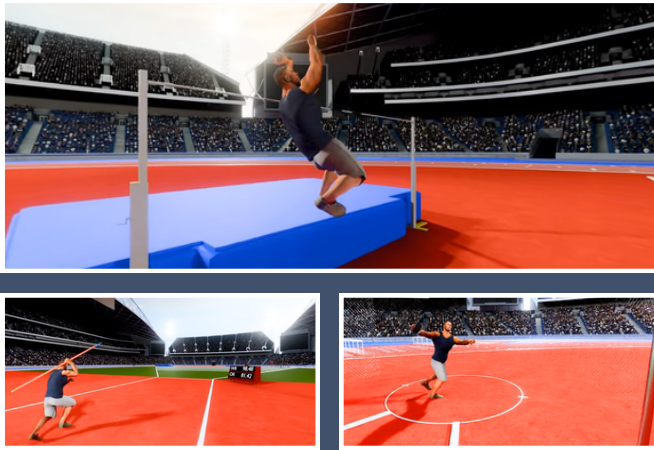

Aramco Safety 360°

A 360° immersive training experience designed for Saudi Aramco to educate personnel on operational procedures and safety protocols in a high-risk industrial environment. Users engage with interactive scenarios, testing their knowledge and decision-making skills through realistic simulations and assessment questions.

Dynamic Athletic Game of 360° Video

A 360° immersive video experience that allows users to observe and learn the correct and incorrect techniques across eight different dynamic sports. Users can watch detailed demonstrations of each sport, gaining a clear understanding of proper form, common mistakes, and key performance principles, all presented through engaging 360° visuals in a fully virtual environment.

Tourism 360° Simulation

Al-Azraq 360°

A virtual experience showcasing the cultural, environmental, and historical diversity of Al-Azraq. Users journey through its civilizations, exploring its heritage and learning about the communities and people who have shaped the region.

Al-Dahak 360° & VR

An animated immersive experience set in Al-Dahak area in Jordan, highlighting the social, developmental, and environmental challenges faced by the local community. Can be presented through Virtual Reality (VR) and Mixed Reality (MR) platforms.
